

Market Movers Dutching System

Dutching the highest 2 positive **Mov1** movers and the highest 2 positive **321** movers in each race on **JustStartHere** over the last 2 days has returned a profit of **11.40 points** after Betfair commission (based on prices 1 minute before the off). There were **26** winners out of **43** races (**60%**).

The Mov1 & 321 values appear on the JustStartHere Upcoming Races screen 1 minute before post time (the values of the qualifying selections are outlined in black below). They show the price movement between 11am and 1 minute before post time and 3 minutes and 1 minute before post time respectively.

If there weren't 2 positive values, horses that recorded the lowest negative values or values of 0.00 were selected. In cases where 2 or more horses recorded the same Mov1 or 321 values, horses that hadn't already qualified as selections were selected. If this still didn't identify a selection, the horse with the superior Mov1 or 321 value was selected.
